**Subject:** Follow-up from Feb 6 Nutrient Forum  
**Date:** Thursday, February 14, 2019 3:22:55 PM

---

Good afternoon,

This is just a short follow-up from last week's Puget Sound Nutrient Forum. We appreciated the challenging questions and discussion, and I hope that it was useful for you all too. We will be posting our notes from the Forum soon, but here are some links that are relevant for you now:

- Presentations are now posted on our Forum [meetings and resource page](#)
- The Salish Sea Model result [web map](#) so you can dig into the results yourself

Here are links to many of the posters that were hanging around the room; they were created by Ecology scientists for the 2018 Salish Sea Ecosystem Conference:

- (Phytoplankton blooms in 2015)  
<https://fortress.wa.gov/ecy/publications/SummaryPages/1803028.html>
- (Climate patterns affecting seasonal water residence time in Puget Sound)  
<https://fortress.wa.gov/ecy/publications/SummaryPages/1803023.html>
- (Spatial distribution of benthic macroinvertebrate biomass in Puget Sound)  
<https://fortress.wa.gov/ecy/publications/SummaryPages/1803020.html>

The March 6 Forum will be held at the Lacey Community Center, and we've lined up speakers from Chesapeake Bay, Long Island Sound, and San Francisco Bay to talk about nutrient management efforts in those waterbodies. You'll have the opportunity for direct engagement with these speakers and we hope to have a very useful conversation about what worked well in those areas and how those lessons could inform our efforts here in Puget Sound.

Thank you for your continued engagement in the Forum and the Puget Sound Nutrient Source Reduction Project.
